Art Unit: 1761

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to a sweetener utensil, classified in class 426, subclass 104.
- II. Claims 9-12, drawn to a method of making the utensil, classified in class 426, subclass 515.

The inventions are distinct, each from the other because:

The product as claimed in Group I can be made by methods other than that recited in Group II. For example, the product does not required the steps of cooking to form a mass, shaping the mass into a product stream, dividing the stream into subunits and forming the subunits. The product could be made by cooking raw cane sugar directly in a unit mold in a batch operation. Also, the product does not require being packaged in an atmosphere of reduced oxygen.

Because these invention are distinct for the reasons given above and have acquired a separate status in the art requiring separate searches as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven L Weinstein whose telephone number is (571) 272-1410. The examiner can normally be reached on Monday-Friday 6:30am to 3:00 pm.
